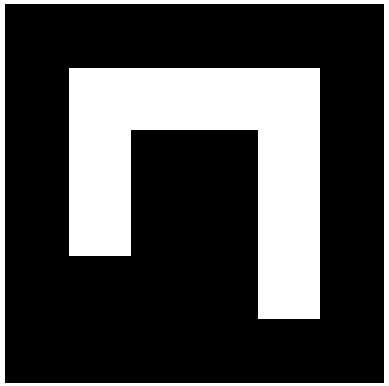
SWORD / TRACKING MARKERS

Print at actual size / 100%. Measure the black square: exactly 50 x 50 mm. Keep the white border.

YOUR SWORD / 10

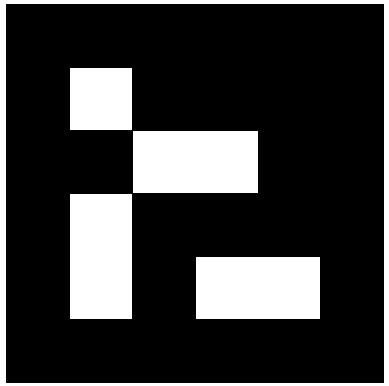
TIP / UP



50 mm black square / ArUco 4x4_50

ROBOT SWORD / 20

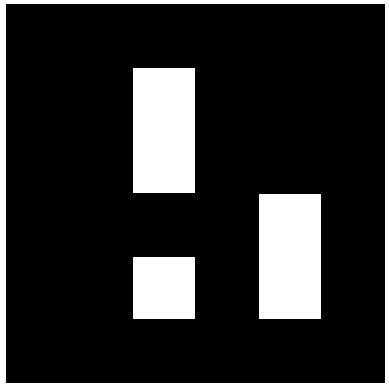
TIP / UP



50 mm black square / ArUco 4x4_50

FIXED REFERENCE / 30

TIP / UP

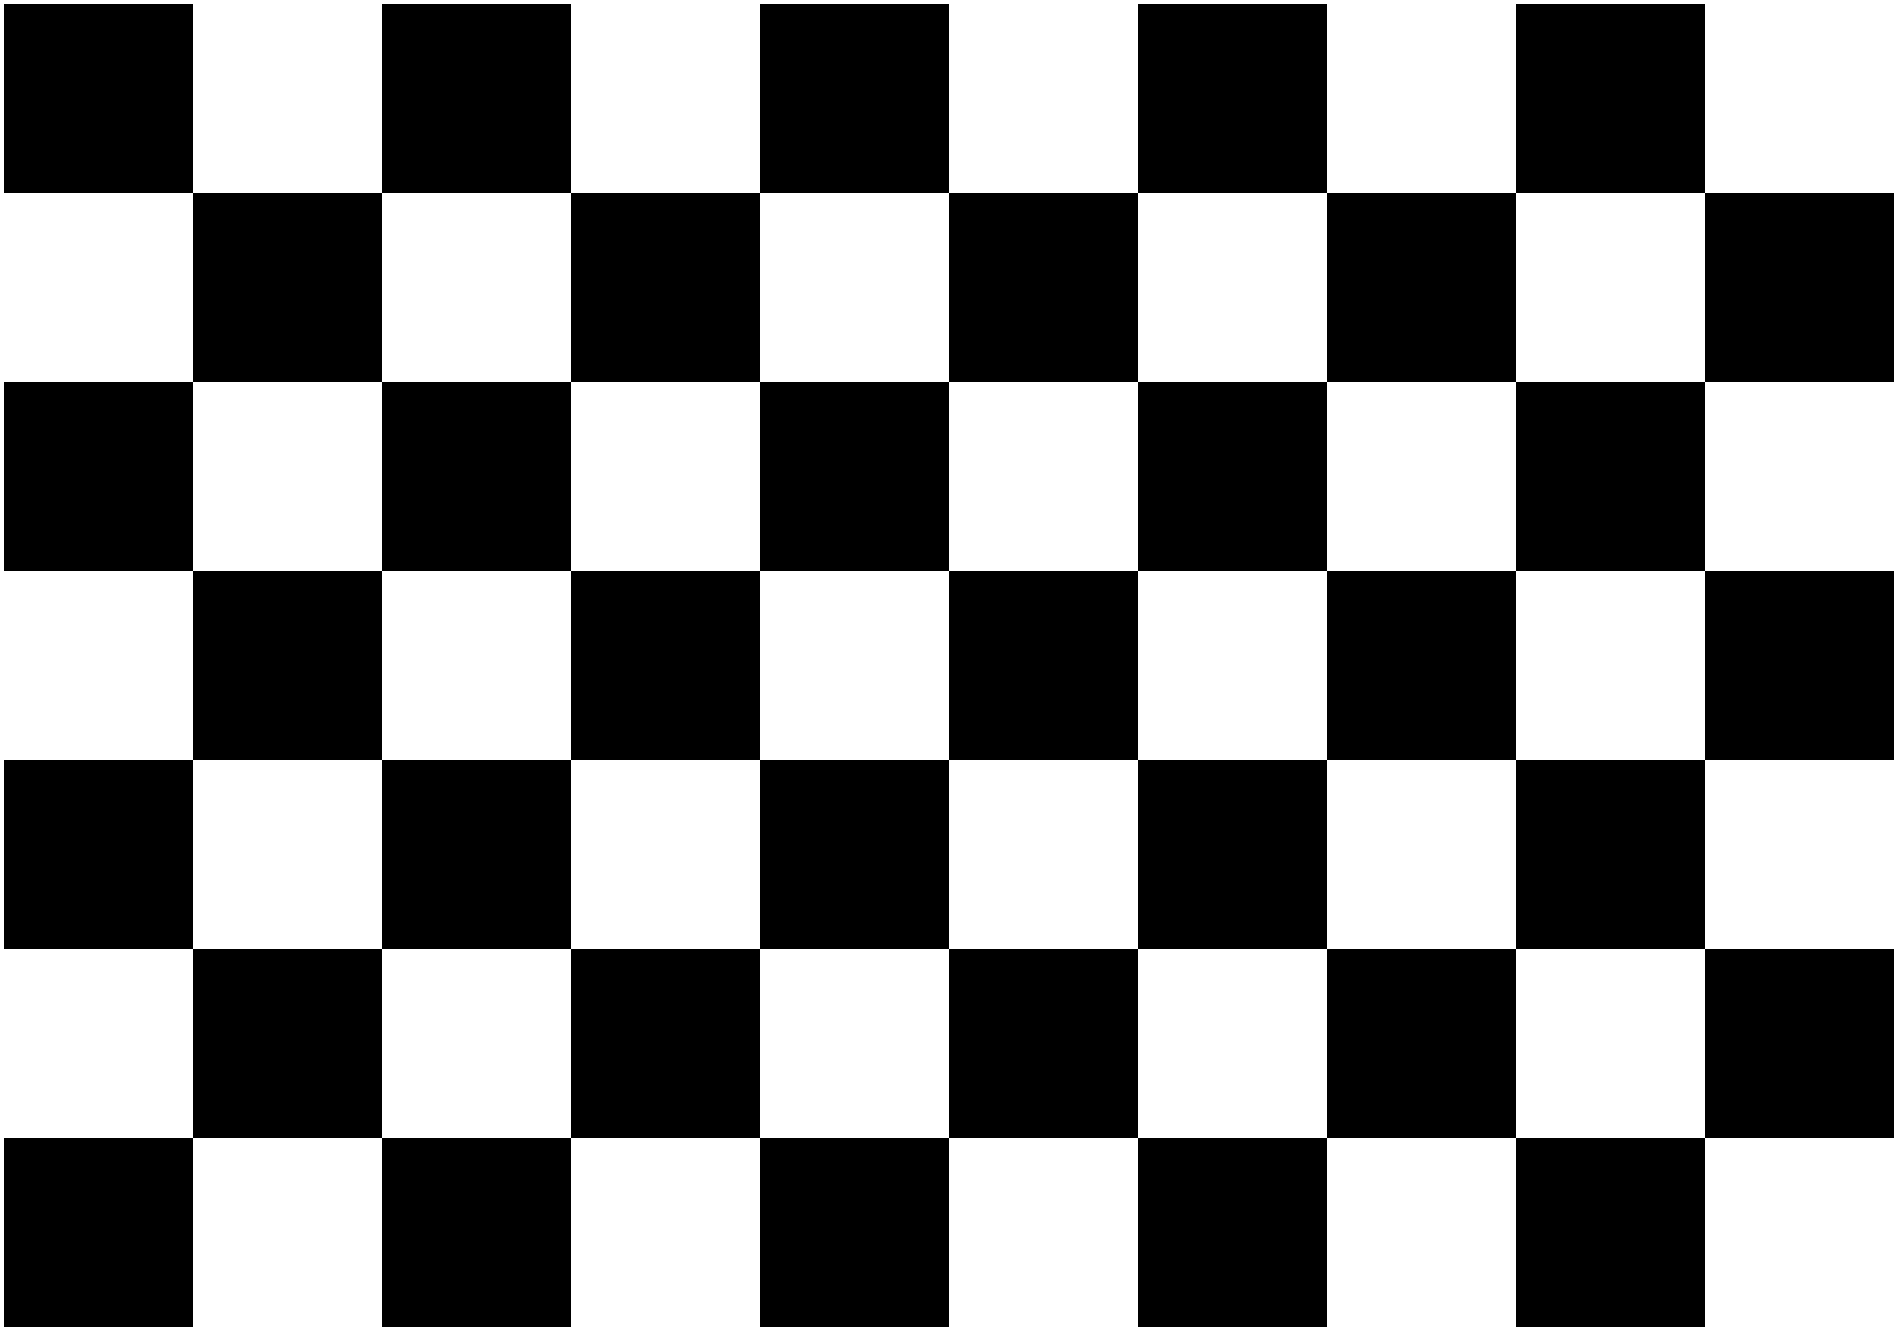


50 mm black square / ArUco 4x4_50

Mount each sword marker flat, arrow toward its tip. Keep the pattern and white border visible.
For the 42 cm overlay, place the marker centre at the blade base. Do not fold or wrap it.
Fix marker 30 upright near the robot; it must stay still. All three must fit in the camera view.
Use matte paper on a rigid backing. Avoid shiny tape over the pattern.

100 mm - measure this after printing; printer scaling changes the 3D scale.

CAMERA CALIBRATION / 25 mm squares / 9 x 6 inner corners / print at 100%



Keep this sheet flat. Capture 12 views at different positions, distances and tilts in the app.
